

Sirenade: The street theatre opera

TECHNICAL RIDER

- Duration: approximately 30 minutes
- Minimum ceiling height (for indoor performances): 4 meters
- Required space: 18 meters diameter (play area) + at least 3 meters around (buffer space)
- Surface: flat and stable (grass is certainly possible as long as it is not swampy or very uneven)
- Playing area: 360°
- Capacity: 100-180 seats
- Power supply: at least 1 outlet near the playing area
- Audio: self-sufficient.
- Setup time: 3 hours
- Breakdown time: 2 hours
- Break between two performances: at least 30 minutes, maximum 90 minutes

WEATHER RESISTANCE

- The performance can proceed in moderate wind and light rain. In case of poor weather conditions, the organizer provides an alternative (indoor) location. A performance canceled due to weather conditions on-site is considered as having taken place.

Backline

- 4 headsets and receivers
- 4 speakers
- Mixing table
- Lighting when at nighttime
